

**KB01085****Intake duct cleaning device**

Additionally, the set contains
2kg of nutshell abrasive.

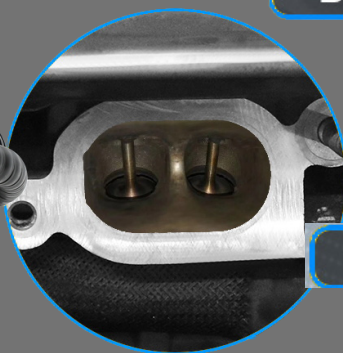

Professional intake duct cleaner from carbon deposits.
Carbon deposits lead to engine idle instability, insufficient
air intake, power loss and reduced engine efficiency.
KB01085 helps to effectively clean carbon deposits,
restoring your engine to full efficiency!

Fast and powerful intake duct
cleaning device

KB10085 is a powerful device that
ensures that carbon deposits that
have strongly adhered to engine
intake components are safely
removed. The device allows the
cleaning of such components as
intake manifold, intake ducts, intake
and exhaust valves.

Technical data:

- Power supply: 230 V
- Max power: 1200 W
- Volume: 13 L
- Air consumption: 300l/min
- Suction power: 0,02 MPa
- Dimension: 400x400x540 mm
- Weight: 10kg
